About Us

❖ Our Head Office (Year 1994) is located in Seoul, South of Korea and HanKook Industries, which is one of our global core centers, is based in Chennai, India from 2012.

❖ HanKook Industries is a Global Total Moving System Solution Provider about Automatic Car Parking System, Elevator, Escalator and Crane & Hoist.

❖ We have three(3) global manufacturing factories to support our client's various needs. In addition to our multinational factories, we are technically cooperating with SimmaPark(USA), Baroin(Korea) and Matiz(Japan) to innovate our products for global market.

Company Mission

Since 2012, our mission is to solve domestic and overseas urban parking shortage and revitalize urban centers by utilizing the world's most advanced, affordable, and eco-friendly mechanical car parking system in India.

After Coronavirus 19, we have been strongly proposing our systems for non-face-to-face contact to global market.

Who demands Automated Car Parking?

- For developer, build more parking with multilevel , less cost to save construction cost of parking lot

- For municipalities, solve congested parking problems , promote the greenest parking available, environment friendly such as anti air pollution following world wide trend.

- For building owner, secure a sizable parking bays in limited spaces

Maximize Space and Minimize volume

Conventional Parking Garage
Capacity: 800 cars

Automated Parking Garage
Capacity: 800 cars
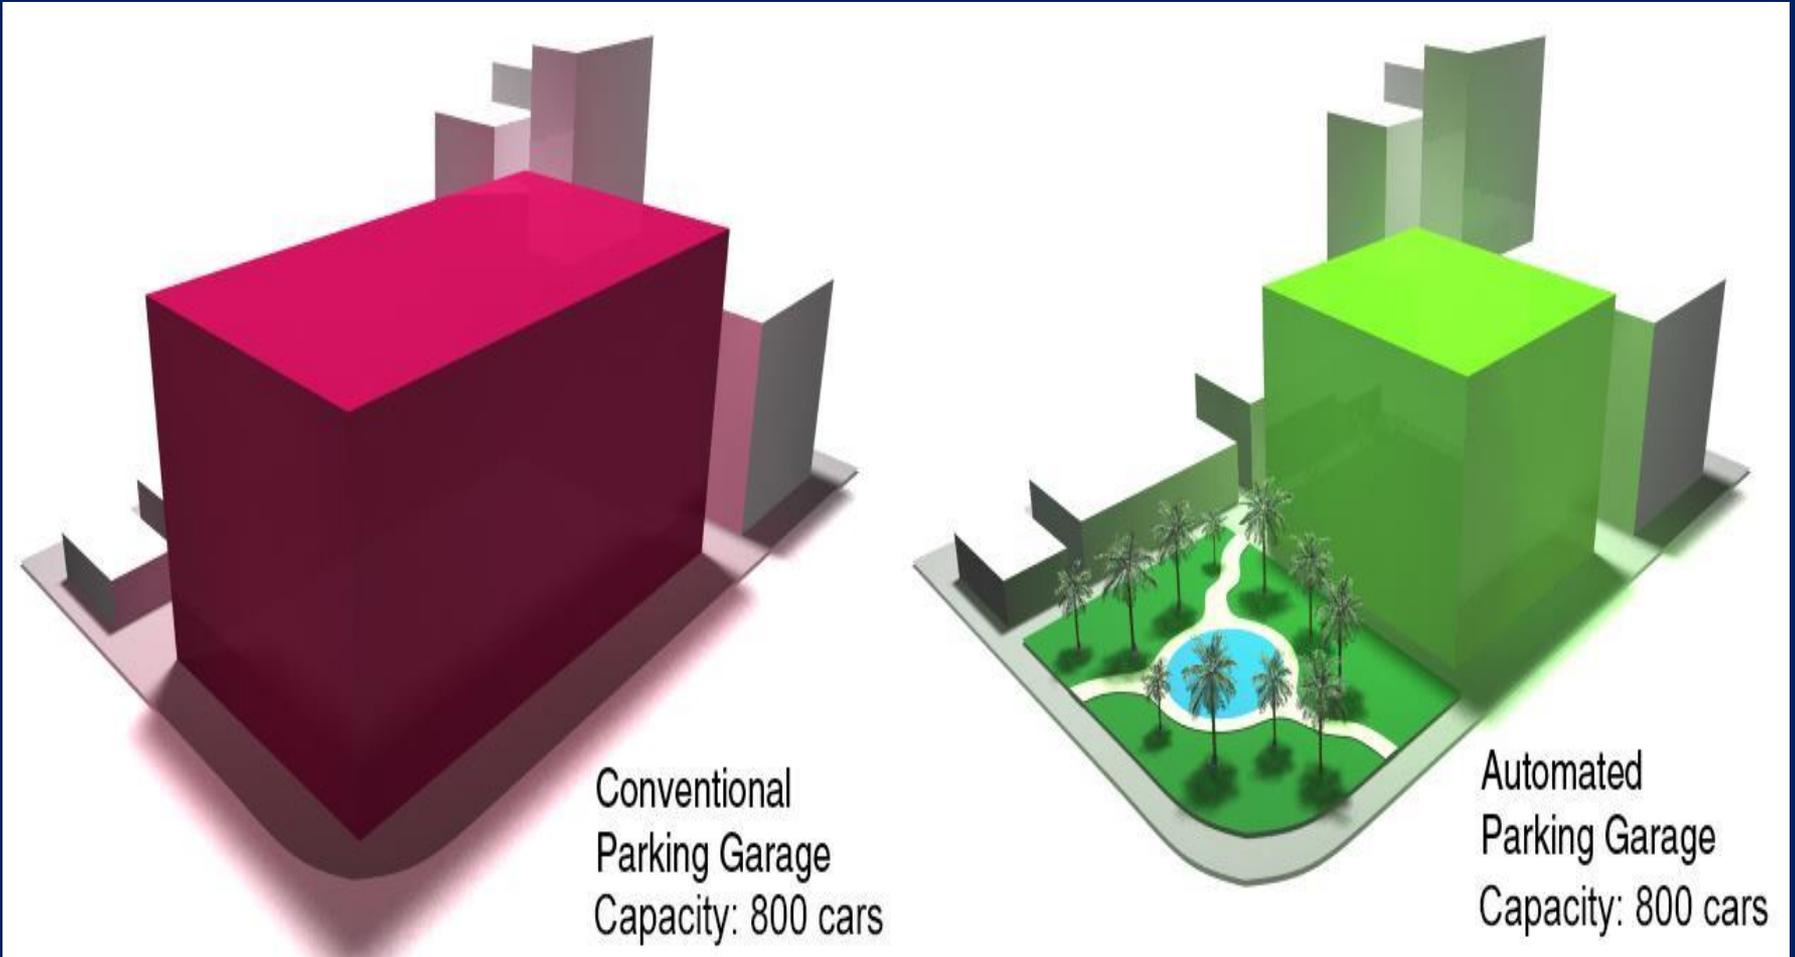

Turn Parking Lots into The Park

- Make use of wasted space and Install automatic car parking system under ground
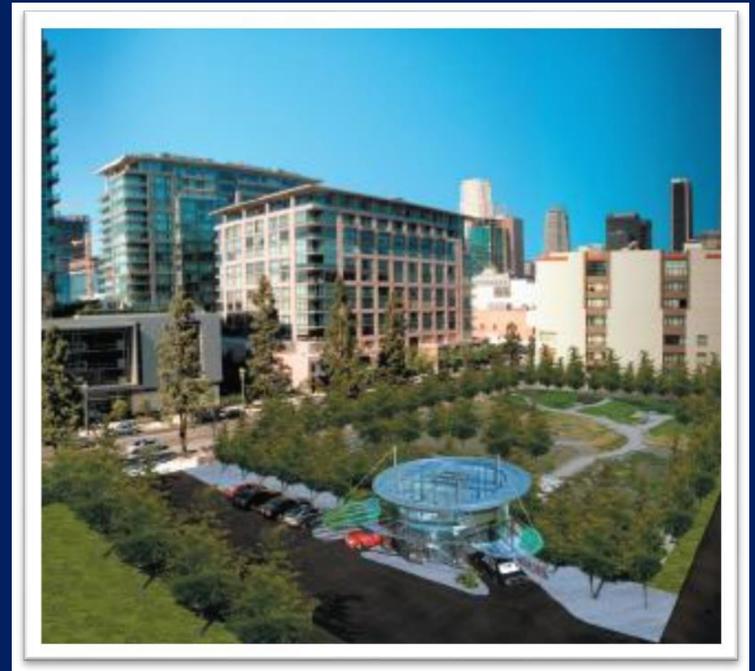

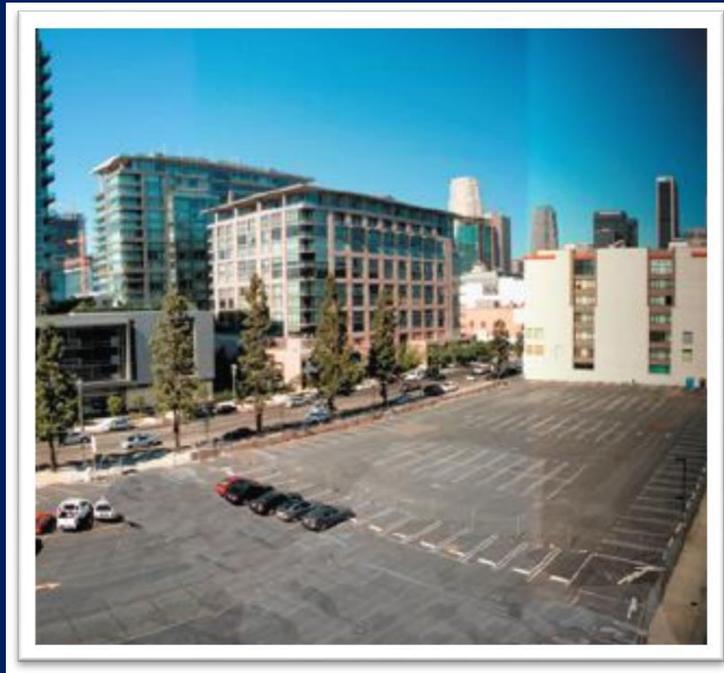

Business Model

- Full supplying including commissioning
- Our Factory Locations
  - Factory in India
